

**LASER AMMO™**  
TRAINING TECHNOLOGIES

## Introducing the SureStrike™ System

The SureStrike™ Laser Training System allows shooters at any level of experience to safely practice stance, gun presentation, sight alignment, sight picture, breath control, trigger pull and follow through drills with their own weapon wherever they choose.

The central element of this system is the SureStrike™ cartridge, which fits directly into the chamber of any firearm and is activated by the impact of the firing pin.

Upon impact, the cartridge emits an eye safe laser pulse simulating a bullet's point of impact.

Unlike other laser cartridges on the market, this chamber-loaded cartridge includes the UhrSecure™ system - a safety pipe that stretches from the chamber through the barrel of the firearm, eliminating the possibility of a live round accidentally being loaded.

**The rod also adds to the laser's accuracy and allows for a visual indication that the gun is safe.**

The SureStrike™ System works with simple reflective targets, interactive targets or can be programmed to work with a variety of simulators.

Every cartridge is warranted for 5,000 shots.

All SureStrike™ Kits come with 6 reflective targets, a user guide, battery pack and various caliber adapters depending on user preferences.

### Other Benefits:

- No misfires
- High quality glass lense
- Offered with red laser or IR
- Convert cartridges to all calibers including pistols, shotguns and rifles

### Technical Cartridge Information:

- Contains computer microprocessor
- Powered by batteries
- Stainless steel construction
- Laser class 3a Eye safe laser
- Lead free
