

LASER AMMO™
TRAINING TECHNOLOGIES

SureStrike™ Caliber Adapters

Pistol Adapters:

Designed to save you money, the SureStrike™ adapter rings fit on our standard 9mm SureStrike™ cartridge and convert it to different calibers, eliminating the need to purchase an entirely new laser cartridge for every new caliber.

Available for semi-autos and revolvers:

Installing the adapters takes less than 30 seconds. The caliber adapter simply threads directly onto the SureStrike™ cartridge.

Rifle & Shotgun Adapters:

SureStrike™ rifle caliber adapters are precision made to fit your rifle.

Rifle adapters are available for .223, 7.62, 308 and .30-06 (coming soon).

For .223 just change the back cap on the 9mm cartridge to the 223 for AR15 cap and add the barrel adapter.

This feature is especially convenient for police officers, who can use the same laser bullet to train with both their service pistol and rifle / AR / shotgun.
