TRAINING TECHNOLOGIES

LA-FLASH Suppressor Full-Blowback Airsoft Rifle Training

Don't just train like a pro – train like *the* pros. The LA-FLASH suppressor replacement converts your airsoft rifle into a vibration-activated recoil-enabled rifle that collaborates with simulators, electronic targets and tactical vests for an optimum laser-training experience.

It's the closest you can get to the authentic look, feel, trigger pull and blowback of your actual weapon. Plus, it's the only way to cycle with blowback an AR15, an AK47 or other similar rifles for an amazing practice.

The LA-FLASH will introduce a new level of professional training into your dry-fire practice – here's why:

- Converts airsoft or rifles into full-blowback training tools
- Houses the Laser Ammo SureStrike™ vibration cartridge for optimum simulation
- Coordinates with training software, electronic targets and tactical vests
- Allows laser windage and elevation alignment
- Easily converts back to shooting pellets
- Available in both infrared and red

LA-FLASH is the suppressor replacement tool that will convert any casual trainee into a serious trainee – it's masterful laser training in an unassuming package.

About Laser Ammo

Laser Ammo Ltd., develops and sells firearms training products for civilian, law enforcement and military markets. Owned and operated by former Israeli and U.S. military combat veterans, Laser Ammo is dedicated to providing serious training for serious professionals and beginners alike. The Laser Ammo family of products allows operators to utilize their specific weapons platforms, ranging from semi-automatic pistols or rifles to airsoft or recoil-conversion systems, for advanced dry-fire training.
