TRAINING TECHNOLOGIES

## SureStrike™ LaserPET™ Electronic Target

The Laser Ammo Personal Electronic Target (PET) improves shooting skills such as drawing, target acquisition and trigger squeeze while building a solid foundation for accuracy.

Shooters can hone their skills through multiple training drills along with immediate audio, visual and numeric feedback. The easily portable LaserPET™ works with any of the SureStrike™ laser training cartridges.

Its compact size makes for easy storage and practice anywhere. Comes with a built in with shot timer, buzzer and large LED counter.

### LaserPET™ offers three operational modes:

1. Hit Counter - Tracks consecutive hits.
2. Shot Timer / Fast Draw - Tracks the time from buzzer to hit.
3. Magazine Change / Stress Simulation - Times the shooter as if changing a magazine and subsequently counts how many times the shooter can hit the target within five seconds.
4. Double Tap / Cowboy Action: work on your timing between shots. Timer will start after your first shot and stop after your next one.

Product Includes	Features
<ul style="list-style-type: none"> <li>• LaserPET™ electronic target</li> <li>• user guide</li> <li>• 5 different Target cards</li> <li>• 1.8"X1.8" laser sensor</li> <li>• LED display</li> <li>• Tripod and wall mounts</li> </ul>	<ul style="list-style-type: none"> <li>• Buzzer</li> <li>• Changeable target cards to change target area, size and shape</li> <li>• Three operational modes</li> <li>• Built in timer</li> <li>• Input for external sensor</li> </ul>
