

LASER AMMO™
TRAINING TECHNOLOGIES

Interactive Multi Target Training System i-M.T.T.S

Bring an advanced-training range to your own backyard. The Interactive Multi Target Training System is an interactive training solution that won't break the bank, is versatile and is user-friendly.

There's no better tool when it comes to interactive multi-purpose training, from its computer-less target-to-target communication to the multiple drill configurations.

The multi-target system is the next stage of your regular training schedule – here's why:

- Built to work with SureStrike™ and vibration cartridges – both red and IR
- Configures buzzer- or light-based indicators – or a combination of the two
- Functions in five different modes – standalone, steel-plate shooting, tactical training (“chase the ball”), shoot/no-shoot or double-speed shoot/no-shoot
- Comes with four three- to five-inch cards per target

Build your skills like law enforcement does – the Interactive Multi Target Training System will transform the way you train.

About Laser Ammo

Laser Ammo Ltd., develops and sells firearms training products for civilian, law enforcement and military markets. Owned and operated by former Israeli and U.S. military combat veterans, Laser Ammo is dedicated to providing serious training for serious professionals and beginners alike. The Laser Ammo family of products allows operators to utilize their specific weapons platforms, ranging from semi-automatic pistols or rifles to airsoft or recoil-conversion systems, for advanced dry-fire training.
