

LASER AMMO™  
TRAINING TECHNOLOGIES

## Advanced Training Laser Pistol A.T.L.P

Used by elite military units and police departments worldwide, the Advanced Training Laser Pistol (A.T.L.P) is now available for the first time ever to the civilian firearms community. It's a cooperation between two industry leaders - Laser Ammo and Smart Firearms.

The laser pistol was designed first and foremost to teach proper trigger use by using the proprietary accidental-discharge sensor for those training for optimum safety.

The A.T.L.P holds for hundreds of thousands of shots – it's a robust, sturdy tool for any laser-training regimen.

### **The A.T.L.P is a must-have for any serious trainee – here's why:**

- Magazine clicks when changed, simulating a real-life mag change
- High-end night sights available
- Accidental discharge sensor
- Laser available in red and IR - it's versatile and offered in various program configurations
- Laser is easily released from rail with options for windage and elevation adjustments
- S&W/M&P-compatible
- Special buzzer indicates shots' discharge

**The A.T.L.P revolutionizes firearms training – prepare and train yourself to make negligent discharges a thing of the past.**
