

LASER AMMO™
TRAINING TECHNOLOGIES

Recoil-Enabled Airsoft Laser (R.E.A.L.) Conversion Kit for KWA ATP and M9

The Laser Ammo **Recoil-Enabled Airsoft Laser (R.E.A.L.)** Conversion Kit includes a replacement drop in barrel that converts KWA ATP and M9 airsoft pistols to laser-emitting, full-blowback training pistols that simulate real firearms, thanks to the vibration-activated SureStrike™ cartridge (purchased separately).

Installation of the R.E.A.L. Kit is done simply by replacing the stock barrel with the kit assembly, enabling users to start training with any of our electronic targets, training software or smokeless range simulators with 100% safety.

Develop and maintain your shooting skills: Practice your stance, gun presentation, sight alignment, sight picture, breath control, trigger pull and follow-through with the SureStrike™ airsoft adapter that includes a full cycle and airsoft blowback.

THE CLOSEST THING TO LIVE FIRE ON THE MARKET TODAY!

- Quick and easy to install
- High accuracy - quick and easy alignment
- Full blowback simulates an operational firearm
- Activates all electronic targets, training software and simulators
- Activates MILES
- Great in force-on-force training
- Perfect for concealed carry or pistol-firing technique training
- Fits inside standard holsters, because all ALC parts are internal
- Does not interfere with laser sighting or flashlight attachments
- Magazine simulates loaded-weight magazine
- 100% safe to use anytime, anywhere

MSRP	\$150
