

LaserPET

The **LaserPET™ (Personal Electronic Target)** family of targets (LaserPET™ and LaserPET™ II) are a set of standalone targets that aim to train any level of shooter for increased speed, quicker reloads and higher accuracy, using the shooter's own pistol, rifle, or shotgun.

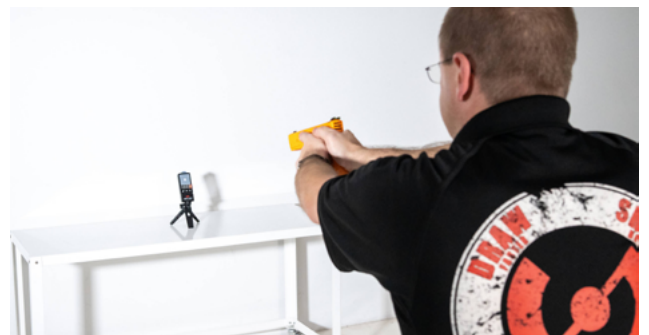

Laser Ammo's philosophy behind the **LaserPET™** is "Aim Small, Miss Small" - included with the **LaserPET™** family are 5 assorted target cards with hit zones ranging from 2 inches to 1/2 inch, that can represent a full torso size target from hundreds of yards away.

The **LaserPET™** target will also help any shooter train to better their: presentation, shooting from a holster, trigger control, reloads and overall marksmanship.

Advantages of using the **LaserPET™**: Easy to use, no computer needed, can be used anywhere anytime, sound and visual feedback with every shot.

	Laser PET	LaserPET II
