

Smokeless Range® – Use of Force and Marksmanship Simulator

The Smokeless Range® by Laser Ammo is a high end, budget friendly, shooting simulator to train for marksmanship and use of force. True to our philosophy, Laser Ammo is able to offer the expensive technology that has been previously used only by government agencies, to firearms trainers, LEO/MIL departments, and recreational shooters.

With an unbelievable price, using the shooter's own computer, home projector or TV, inexpensive screen or white wall, and a Laser Ammo IR recoil gun or SureStrike™ laser using the shooter's own firearms, any level of shooter can now train on their core firearms drills, for their next IPSC or steel challenge competition, for any situational awareness or just for entertainment with the family in his comfort of their own home or office.

The Smokeless Range® includes a high-speed camera for infrared and red SureStrike™ lasers, five different marksmanship drills, and five additional recreational drills, including:

Marksmanship drills: Transitional Drills, Tracking Drills, Speed Drills, Moving Targets and Matching drills

Recreational drills: Dueling Tree, Trap Shooting, Target Shooting, Can Toss and Bomb Blast

Many additional add-ons are available to provide well-rounded training in various disciplines. 15 day free trials are available for all of the Smokeless Range® add-ons at: <http://smokelessdownload.com/index.html>.

Need to operate within a smaller footprint with harsh lighting conditions (like a trade show or a small classroom)? Laser Ammo is offering a camera upgrade to a short throw camera, that changes the original camera ratio 1:1.6., to a 1:0.5 ratio. For example, if your screen size is 10 feet by 10 feet, with a regular camera, the camera and projector need to be set approximately 16 feet away from the screen. With a short throw camera, and a short throw projector you can be approximately 5 feet away from the screen.

Looking to purchase additional software? All software add-ons available for purchase separately, or as part of a package as seen below.

Available as:	SKU / MSRP	ST SKU / MSRP
